Armaan Ballagan

Student programmer looking for work experience opportunities

Skills:

Python
1+ years of experience working in python. I'm proficient in using this language to turn ideas into reality.

C++
I have experience programming in C++ to work with Arduino's

Object-oriented programming
I've used object-oriented programming to design and program my game "Muffin Time". I'm confident in my ability to work with this concept and being able to further apply it in more challenging applications.

Personal Attributes

- Creativity
- Communication
- Problem solving
- Teamwork
- Perseverance

Education

Math Pre-calc 12 – 95%

Programming 11 – 96%

Computer Science CO-OP - Ongoing
The Coop is composed of **Calculus 12, Physics 12, Computer Science 12, and Computer Information Systems 12**. The computer science coop teaches elements of math and physics to allow students to develop an overall better well-rounded understanding of the principles of Computer science.

Projects

Muffin Time:
"Muffin Time" is a platforming indie game with an original concept and many creative design elements. **Object-oriented programming** was implemented to design and program the game.

Volunteering

Community Care Club:
Many volunteer hours were earned from volunteering at the Community Care Club Boba fundraiser. The proceeds were sent to reconciliation Canada to support the reconciliation process of indigenous peoples. My volunteering shows that I'm a committed and responsible individual
